

# facing the world

fighting for children with facial differences

NEWSLETTER OCTOBER 2020

## *Fighting for Children with Facial Differences*

In this period of great worry as the world confronts Covid-19, Facing the World continues to pioneer a bold new approach to sustainable healthcare as we accelerate our telemedicine activities to ensure meeting children's medical needs remains a priority and is effectively addressed.

We put education at the forefront of everything we do. Our approach combines all aspects of teaching through missions, fellowships, technology and telemedicine, and ensures children born with facial differences continue to receive the surgery they need.

We are very excited about the future but, as ever, your support would make such a difference. These children have all been able to receive treatment over the past few weeks. There are so many more waiting.

*Patient clinic at 108 Military Central Hospital's Centre for Plastic and Craniofacial Surgery Summer 2020*
